Company Information:

- **Cabot Oil & Gas** is a leading North American exploration and production independent.
- **Cabot Oil & Gas** is headquartered in Houston, Texas
- The company's reserves are focused in both conventional & unconventional basins including the East, the West (Rocky Mountain and Mid-Continent), the Gulf Coast (South and East Texas to North Louisiana) and in Canada.
- Cabot Oil has more than 1.2 trillion cubic feet of proven reserves and operates nearly 2,500 miles of pipeline and 4 billion cubic feet of storage capacity in the Eastern U.S.
- The company's development programs enable active production growth. Its exploration effort is designed to provide offset development opportunities.
- **Cabot Oil's benefits include:** Salary Bonus, Long Term Incentive Plan, Medical, Dental, Flexible Spending Accounts (FSA's), Life Insurance, Voluntary Group Term Dependent Spouse & Child Life Insurance, Accidental Death & Dismemberment Coverage (Ad&D), Short Term Disability Benefits, Long Term Disability, Savings Investment Plan (401K), Pension Plan, Employee Assistance Program, Tuition Reimbursement

Community Information: The City of **Charleston**, a gateway city with convenient access to three major interstate systems has outstanding opportunities for its citizens. The city lies at the intersection of Interstates 79, 77, 64, and also where the Kanawha and Elk Rivers meet. Charleston is about 162 miles southeast of Columbus, Ohio and 228 miles southwest of Pittsburgh, Pennsylvania. Charleston, the capital of West Virginia and the largest city in the state, has a population of 50,846 and a metro area of 307,763. Charleston is rich in history and culture. The Clay Center for the Arts and Sciences provides a realm of activities for visitors to explore. The community offers several beautiful golf courses, public swimming pools, tennis courts, boating activities, public parks, its own Class A baseball team, and historic sights for citizens and visitors to enjoy. The city offers a variety of fine cuisine with four and five star rated restaurants. Bookstores, art galleries, specialty shops, and quaint cafes border tree-lined streets in the downtown area.

Your Role with the Company

The primary role for the Development Geologist will be to come up with Exploration ideas and generate prospects. This job will be 50/50. The most important part of the job is the development. The other half will be working or assigned to one of the least active districts where if we have a well, then putting a lease on it. If someone is not from the Appalachia region, current management describes this as "BASIN SHOCK".

Services don't exist to just call and get a Production Map or Well Maps. Most of it is on paper. For example, Pennsylvania maps are on paper. Cabot is very stable and the earning potential is great. The Exploration Manager is looking to retire in 4 years, and ideally, there will be a need to replace him. This is a golden opportunity for the right candidate.

Responsibilities

- Generate development drilling locations from geological and engineering data
- Work with operations personnel, landmen, engineers, and technicians to implement the development program
- Manage and Maintain PUD inventories in map form for assigned are of responsibilities
- Present projects, prospects and ideas to management with recommendation for action
- Perform other duties, as needed or assigned to meet Region's objectives

Required Experience and Skills:

BS Geology, MS Degree - an advantage

5+ years work experience

PC Skills including Work, Excel and Power Point

GeoGraphix
