

On Target Performance Management System

Job Title: Geologist - Canonsburg, PA

Reports To: Manager - Exploration

Alt. Title(s):

Department: Exploration

Salary Range:

Reference Code: C50128548-1

Position Summary

This position is responsible for collecting, interpreting, modeling and mapping geologic and coal quality data for coal exploration and coal reserve evaluation projects.

Target Responsibilities

Plan and conduct exploration drilling programs. This may include obtaining required drilling permits, supervision of drilling and excavation contractors, supervision of geophysical logging, core logging and sample collection.

Serve as company representative for contractor compliance with Consol safety policies.

Prepare drill-hole logs and records for inclusion in company files and digital databases. Prepare samples for shipment to analytical laboratories. Provide data to other company departments.

Prepare geologic maps and cross-sections required for coal reserve evaluations, coal mineability studies and mine permitting.

Prepare geologic and coal reserve evaluation reports.

Provide geologic support to other company departments including Coal Operations, Operations Engineering, Engineering and Environmental Services, Legal and CNX Land.

Minimum Requirements

Bachelor of Science degree in Geology (Master's degree preferred) and 3 to 5 years experience (mining industry preferred).

Must possess strong interpersonal skills that will permit effective communication with landowners and contractors during exploration drilling projects.

Basic personal computer skills (Microsoft Office) required; experience with geologic modeling and/ or CAD software highly desirable.

Off-road, 4WD driving experience desirable.

Travel to various North American coalfield areas required.
