

Geologist 3 - Ohio Geological Survey

The Ohio Geological Survey seeks applications for the position of Geologist 3 for the Geologic Mapping & Industrial Minerals Group. The successful candidate will be a versatile and highly motivated geoscientist with a thorough understanding of geologic mapping, bedrock geology and stratigraphy, and glacial geology and geomorphology. Background knowledge in areas such as geophysical exploration, interpretation of logs, familiarity with coring, sampling, and drilling, geologic modeling, and GIS, particularly any 3-D or geostatistical analysis is a major plus. A Master's degree is preferred although a Bachelor's degree with relevant experience will be considered. The complete job posting will be available on the ODNR website beginning August 23rd.

(www.ohiodnr.com); **applications will be accepted thru September 3, 2010.** The Ohio Department of Natural Resources is an equal opportunity/affirmative action employer. For more information concerning application procedures, please contact Rene Norris at 614-265-6406. For more information about position duties and qualifications, please contact Mike Angle at 614-265-6602.

Additional info

The Ohio Geological Survey (OGS) is a Division within the Ohio Department of Natural Resources, with offices located at Fountain Square in Columbus, Ohio and at Alum Creek State Park in Delaware, Ohio. The Geologic Mapping & Industrial Minerals Group currently has a staff of eight full-time geologists plus a part-time seismologist and technicians/interns. The group is involved in diverse research and mapping of deep subsurface to shallow bedrock and surficial glacial and alluvial deposits. This section is also heavily involved in delineating Ohio's geohazards including karst terrain, abandoned underground mines, landslides, and shoreline erosion along the Lake Erie coastline. The Group also compiles mineral resource statistics ranging from coal to sand and gravel aggregate

Excellent written and oral communications skills, publications record, and demonstrable mapping and/or GIS experience is preferred.

Computer Skills: Integrated geologic mapping and analysis software (e.g. GeoGraphix), GIS - ESRI Arc/Info including Geostatistical Analyst, Microsoft Office, Fluid flow modeling (e.g. Mod Flow).

In order to be eligible to accept a permanent part-time or full-time job with the state of Ohio, you must be a U.S. citizen or a legal resident of this country. Those here on student visas cannot be offered permanent employment.
