

UTAH GEOLOGICAL SURVEY
GEOLOGIC HAZARDS PROGRAM MANAGER

The Utah Geological Survey seeks applications for the position of Manager of the Geologic Hazards Program, to begin in January 2008. The Utah Geological Survey is the State's principal agency assigned to identify, inventory, assess, and mitigate Utah's geologic hazards to promote safe and responsible land use. The Geologic Hazards Program comprises 10-12 staff to identify and characterize geologic hazards and prepare geologic-hazard maps. It promotes hazard reduction by disseminating information and assisting government and private-sector users through publications and databases, website information, conferences and workshops, and participation on committees, panels, advisory and review boards, and working groups.

Candidates should have at least a M.S. degree in geology and be licensed as a Professional Geologist in Utah, or meet the qualifications to become licensed, and have experience in program management and supervision. Technical skills and research interests should include engineering geology, Quaternary geology, applied geology, geomorphology, neotectonics, and earthquake- and landslide-hazard assessment.

For a complete announcement and instructions on how to apply, please visit the State of Utah web site at: <http://jobs.utah.gov> after Sept. 1.
