

GEOPHYSICIST

Pittsburgh, Pennsylvania Location

Salary and Bonus Potential Commensurate with Skills and Experience

Premier energy company engaged in the exploration, development and production of natural gas reserves is seeking a highly motivated geophysicist with a minimum of 7+ years experience in unconventional shale gas plays. Candidate must have excellent interpretation skills and experience managing seismic acquisition operations.

Qualifications:

- Responsible for managing and implementing 2D and 3D seismic programs from acquisition design, contractor bidding and evaluation, permitting, recording, to data processing.
- As part of a team, candidate will manage the geophysical interpretation programs. Including supervising license data reprocessing, be the principle interpreter on all seismic projects, and act as advisor to other geoscientists.
- Experience with attribute analysis, azimuthal anisotropy, and elastic inversion technology preferred.
- BS and/or MS in Geology or Geophysics.
- Appalachian/Devonian Shale experience a plus.
- Strong computer skills. SMT Kingdom experience preferred.
- Excellent oral, written and interpersonal communication skills.

Relocation assistance provided. Excellent career opportunity, work environment and benefits package.
